Reset To Default Config ←

Reset To Default Config: The One Step Checkout allows you to reset all fields to default configuration.

1. General Settings

General Settings		
Enable One Step Checkout:	<input type="text" value="Yes"/>	[STORE VIEW]
Page Title	<input type="text" value="One Step Checkout Pro"/> <small>▲ Enter title</small>	[STORE VIEW]
Page Sub-Heading	<input type="text" value="Please input information into the form below!"/> <small>▲ Enter Content</small>	[STORE VIEW]
Default Country	<input type="text" value="--Please Select--"/>	[STORE VIEW]
Auto detect user country using GeoIP	<input type="text" value="No"/> <small>▲ Override default country</small>	[STORE VIEW]
Default Shipping Method	<input type="text"/>	[STORE VIEW]
Default Payment Method	<input type="text"/>	[STORE VIEW]
Allow shipping to different address	<input type="text" value="Yes"/>	[STORE VIEW]
Allow checkout as guest	<input type="text" value="Yes"/>	[STORE VIEW]
Allow Guest to register	<input type="text" value="Yes"/>	[STORE VIEW]
Create an Account Option	<input type="text" value="Unchecked"/>	[STORE VIEW]
Allow Quick Login	<input type="text" value="Yes"/>	[STORE VIEW]
Disable Shopping Cart Page	<input type="text" value="No"/> <small>▲ Customer will go directly to checkout page</small>	[STORE VIEW]
Allow updating product quantity in checkout page	<input type="text" value="No"/>	[STORE VIEW]
Allow removing product in checkout page	<input type="text" value="No"/>	[STORE VIEW]
Validate EU VAT #	<input type="text" value="No"/>	[STORE VIEW]
Auto update account information	<input type="text" value="No"/>	[STORE VIEW]
Show poll on check out page	<input type="text" value="Disable"/>	[STORE VIEW]
Auto disable One Step Checkout Pro on Smartphone	<input type="text" value="No"/> <small>▲ For example: iphone,ipod,android,blackberry</small>	[STORE VIEW]

- ✚ In the **Enable One Step Checkout** field, select Yes to enable the module.
- ✚ In the **Page Title** field, insert the title for the checkout page.
- ✚ In the **Page Sub-Heading** field, the content will be displayed on top of the checkout page.
- ✚ In the **Default Country** field, select one country that you wish to automatically display when customers are navigated to the checkout page.
- ✚ In the **Auto detect user country using GeoIP** field, select Yes to enable this feature. In this case, the module will automatically detect a customer's country based on their IP address.
- ✚ In the **Default Shipping Method** field, select a method. This method will be pre-selected for the user once he enters the checkout page.
- ✚ In the **Default Payment Method** field, select a method. This method will be pre-selected for the user once he enter the checkout page.

Note that:

In the case the customer does not log in, the Country will be selected based on Default Country (or auto detected Country if the '*Auto detects user country using GeoIP*' field is YES). In the case the customer has already logged in, and then the Country will be selected based on the country of this customer information.

- ✦ In the **Allow shipping to different address** field, select yes to allow the customer to select the option of shipping to other addresses that differ from the billing address.
- ✦ In the **Allow checkout as guest** field, select **yes** to allow guests who do not have an account to be able to check out.
- ✦ In the **Allow Guest to register** field, select yes to allow customers who do not have an account yet to register directly in the checkout page. In that case, you can select the value of checked or unchecked for the **Create account option** field.
- ✦ In the **Allow Quick Login** field, select yes to allow customers who have had an account to log in directly in the checkout page.
- ✦ In the **Disable Shopping cart page** field, select Yes to hide the shopping cart page. In this case, when a customer adds a product to the cart, instead of being directed to the shopping cart page, he will be navigated to the checkout page.
- ✦ In the **Allow updating product quantity** field, select yes to allow customers to update quantity for the ordered products.
- ✦ In the **Allow removing product in checkout page** field, select **Yes** to allow customers to remove the products that they have ordered.
- ✦ In the **Valid EU VAT** field, select **Yes** to show EU VAT box on the checkout page. When a customer inserts his VAT number into the EU VAT box, the module will automatically check whether it is valid or not.
- ✦ In the **Update Account Information** field, select **Yes** to activate this feature. When a customer makes the checkout for an order, if he changes his general information (name, DOB, email address, ...) and chooses to update the account information, the module will automatically update the customer account information.
- ✦ In the **Show poll on checkout page** field, select a poll that you want to show on the checkout page

- ✦ In the **Auto disable One Step Checkout Pro on Smartphone** field, insert the code (eg: iphone, ipod, ipad, webos...) of equipment that you want to disable **Onestepcheckout** on (It will load the Magento default checkout instead).

2. Display Settings

Display Settings		
Checkout Page Layout	<input type="text" value="3 Columns"/>	[STORE VIEW]
Style Theme	<input type="text" value="Flat"/>	[STORE VIEW]
Style Color	<input type="text" value="#3399CC"/> <small>▲ Choose color (Scroll over vertical bar, then move circle to desired color in left hand box, save setting with ball in lower right corner)</small>	[STORE VIEW]
Title Bar / Button Height	<input type="text" value="Normal"/>	[STORE VIEW]
Round Corner	<input type="text" value="Disable"/>	[STORE VIEW]
Place Order Button Color	<input type="text"/>	[STORE VIEW]

- ✚ In the **Checkout Page Layout** field, specify the layout for the checkout page (3 columns or 2 columns).
- ✚ In the **Style Theme** field, select the style theme for checkout page (Classic or Flat)
- ✚ In the **Style Color** field, select the display color for checkout bars.
- ✚ In the **Title Bar/ Button Height** field, select height of title bar/ button (there are 4 options: Thin, Normal, Bigger and Biggest).
- ✚ In the **Round Corner** field, If you choose **enable** option, then corners of title bar/button are rounded
- ✚ In the **Place Order Button Color** field, select color for the **Place Order** button

Ajax Update Shipping/Payment Methods when address changes

The One Step Checkout Pro offers a feature that allows the administrator to choose to update shipping methods and payment methods when customers change one of the fields such as Country, State/Province, City, and Zip/Postal Code.

Ajax Update Order Review block when

If shipping method or payment method changes, the information of Order Review block will be updated with Ajax load (option Yes/No)

Other Ajax Updates

- ✓ **Update shipping method when customer updates product quantity:** Allow to update shipping method when customer updates product quantity (option Yes/No)
- ✓ **Update payment method when customer updates shipping method:** Allow to update payment method when customer updates shipping method (option Yes/No)
- ✓ **Enable Auto update guest email:** this feature applies for the sites that have Abandoned Cart extension installed.

6. Delivery Settings

The One Step Checkout Pro allows the administrator to display the delivery time in the checkout page.
